

SPODDS goes digital for 2020!

28th Annual SPODDS Meeting - Virtual Conference

November 18, 2020

8:00am - 4:30pm (Pacific time)

SPODDS

Stanford Project On Deepwater Depositional Systems

In response to COVID-19 travel restrictions and precautions, we will host a 1-day virtual SPODDS meeting. Please join us for a diverse line-up of talks and discussions on current SPODDS research activities from around the globe.

Topics will include:

- Integrated source-to-sink analysis of ocean basins
- Shale geochemistry proxies, both inorganic and organic
- Mudstone redox conditions and depositional environments
- Outcrop and subsurface analogs of fine- and coarse-grained deep-water systems

Meeting details and log-in information will be distributed to affiliates ~1 week prior. Please contact Matt (mamalkow@stanford.edu), Erik (esper@stanford.edu), or Steve (sagraham@stanford.edu) with any questions.
